The HCI Interactive Bedmate Tablet TV is more than a standard touchscreen tablet. Operating through the HCI [MediaCare](#) platform, it's part of a complete solution for a better patient experience. This tablet TV offers patients [education](#), [entertainment](#) and [social connection](#).

- Complete television capability based on facility TV capabilities and options.
- Displays current medications and offers a [Medication Search](#) app.
- Nursing and Care Teams can video chat with patients at the patient's bedside.
- Visitor Log displays all staff entering and leaving patient room when tied to RTLS system through MediaCare.
- Patient access to treatments, care plans and rounding notes.
- Displays Care Team names and photos; auto-updates at shift change.

FACILITY BENEFITS

- [Push surveys](#), notifications, reminders and announcements direct to the patient in real time.
- Customizable banners, branding, colors and layouts by facility, unit, department or specialty.
- Access to [reporting and data analysis](#) to monitor viewing, education compliance and patient status.

Provide access to social networks, games, video-conferencing and self-service options through the BedMate Tablet Television.

Help patients cope with challenging situations using education, social networks, TV entertainment and game apps, alleviating anxiety and boredom for better outcomes.

EDUCATE

Includes Android apps that teach clients and their families the supplemental information they need for discharge, with thousands of [digital health videos](#) available. Send reminders for education compliance to [reduce readmission risks](#).

ENTERTAIN

Residents can choose the TV and [multimedia content](#) that works best for them: on-demand movies, streaming music, podcasts and games. Relaxation content provides a respite from stress for patients and [visitors](#).

INFORM

[Send essential individual or community messages](#) to provide notifications on facility maintenance, housekeeping, status of requests and menus. Push reminders for appointments direct to TV, Tablet and Whiteboard.

CONNECT

Offer safe internal & external videoconferencing for [Telemedicine](#) and virtual family visits with [Family & Friends Connect](#). Staff can video direct to rooms to answer questions and determine [fulfillment](#) of service requests.

INTERACT

[Meal Ordering](#); easy ordering of rental equipment or retail items from facility spaces, and on-site [Pharmacy Fulfillment](#). Patients can [request services](#) direct to specific departments for fulfillment with CareApps.
