

Telecenter U® Kiosk

First-of-Its-Kind Touchscreen Hardware Device for the Classroom

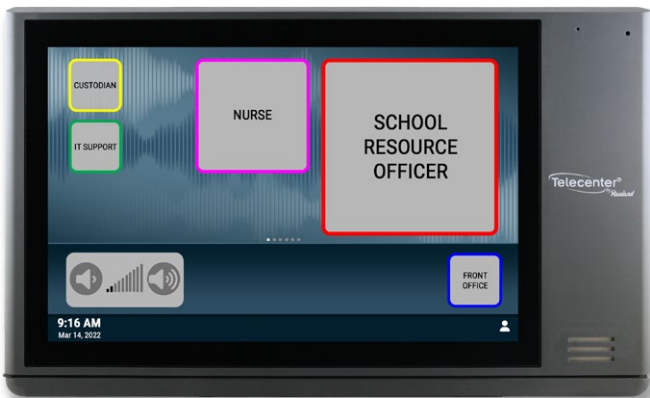

Advanced in-room audio control and emergency response technology for classrooms and offices, giving teachers and staff an innovative communication solution

The Telecenter U® Kiosk is a first-of-its-kind, easy-to-use permanent touch screen device to advance and improve the way teachers and staff interact and communicate and receive information about emergencies in a school. A new addition to the Telecenter U Solution, these wall-mounted touch screens for classrooms and offices give teachers and staff unprecedented management of workflows, and emergency response tools through an app-like user interface that provides audio and visual communications.

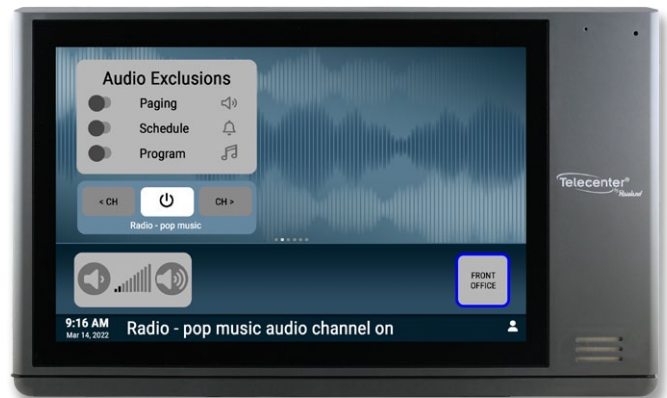

Telecenter U gives administrators powerful tools to manage daily operations and emergency scenarios. With special PIN codes, authorized staff can initiate workflows, assistance or emergency procedures from any kiosk in the building. With the Telecenter U Kiosk, teachers and staff have visual instructions so everyone knows how to respond based on the type of emergency in progress.

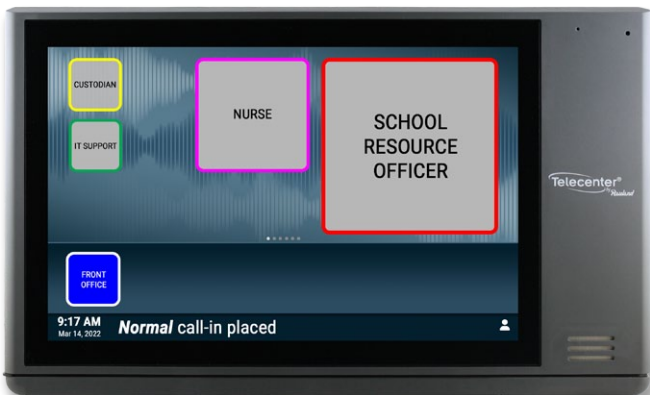

Keeping Classrooms Connected: Tools for Daily Workflows, Emergency Response

Engaging Touchscreen—A bold, bright touch screen inspired by today’s mobile app experience will engage staff and ensure easy adoption and ongoing use. The touch screen device is a permanent fixture in the room so it’s always available for access at any time.

Audio Control in Classrooms and Offices—Kiosk “widgets” control audio settings and play music in the classroom. Staff can temporarily mute and control audio to silence bell schedules or use two-way audio to connect to Rauland consoles for fast communication.

Improved Workflow Management—The easy-to-use touch screen device allows school staff to request assistance directly to IT, custodians, school nurses or other personnel, kicking off workflows immediately.

Efficient Emergency Response—Teachers and staff can initiate emergency procedures from any kiosk in the building. Emergency screens will display with visual prompts, location-based instructions and buttons to check in and notify staff that the classroom is secure or to call for immediate help.

Powerful Tools for Daily Operations

Telecenter U is a market leading network-based school communications system that provides a seamless solution for every school and every classroom in a school district – including IP addressable speakers, POE message boards, a web-based user interface and a mobile application.
