# Telecenter U® Mapping

The Bird's Eye View of Your School District Status

**Instant Information At-A-Glance For Quicker Emergency Response and Status Understanding**

Telecenter U® from Rauland features District and School mapping that allows administrators to instantly view the current status of an entire school district, as well as individual schools and classrooms, on an interactive graphic map. See the real-time status of classrooms, common areas, gyms, and more. Available indicators include intercom and paging calls, classroom cleaning status, flagged IT issues and emergency situations. During emergencies, administrators can quickly view areas marked safe and spot those affected for a quick and appropriate response.
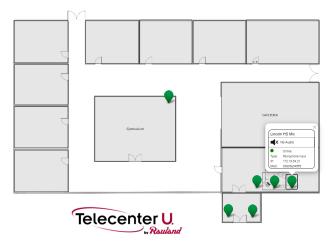

# The new Mapping Feature uses a familiar digital map interface.

View Entire District. The overall district map shows every school in the district. Simply click each marker for the status of each school and to drill down into the school's layout map.

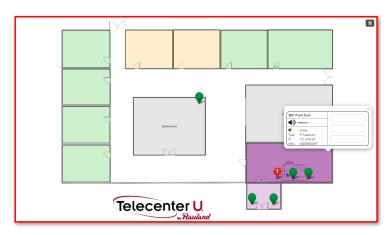

Quickly Spot Classroom Emergency Calls. Easily see when and where an emergency or normal call has been placed from a classroom to the front office with room illumination.

See Status of Entire School on Floor Plan. Administrators can see the status of each room and device. Simply click a classroom or zone for a pop-up window that includes room/zone name, extension number, IT device details and room activity.

Identify and Mitigate School Emergencies. Both school and district views visually indicate an emergency is active. Administrators and first responders can instantly see which areas and classrooms are affected to focus response efforts in the right part of the building.

Connect **Your** Universe®

Telecenter U® makes it easier for schools to operate in today's challenging environment to help keep school districts, schools and classrooms safe and healthy. The network-based advanced communications system from Rauland offers:

- Custom Call Buttons for the unique needs of every school
- Emergency Sequences to a district's crisis plan
- Tools for Everyday Communications and Bell Scheduling
